

Hi!

Thank you for your interest in joining Xtremax as :

JAVA Developer

Below is a simple test case to peel off your insight about programming.

Project Test

Along with this file, you will also receive a zipped **IntelliJ IDEA** project file. Before you are going to the next phase, you will have to complete this project test with the certain score. If you failed this project test the first time, we will give you a 2nd shot with the different set.

i.e :

The first time you get your project test, you get Set-01. Unfortunately, you failed the first test and we send you the Set-02 as your 2nd shot.

You will be invited to the live coding phase once you have successfully passed this project test and finished the demo test that we sent you.

Every set contains 3 section with a different problem. You can read the problem description on the summary written on the top of every section. The project file and its summary is correct, so if there are things that you do not understand, please make an assumption about it.

You just need to be you.
Explore many creative ideas in your own way.
Take a comfort seat and enjoy the test !

Good Luck
